

Benefits

- Integrated inline filtration.
- 3 configurations available
1) sediment, 2) carbon , 3) triple action including scale control.
- Quick-connect fittings available.
- Available in 5 micron.
- 2 length options 6, 10 inch.
- 2 connection sizes – ¼, ¾ inch.
- Flow rates up to 10 litres per minute.

Puretec IL Series cartridges have a slimline design for situations where space is limited. These are recommended for use with ice makers, coffee/vending machines, refrigerators, reverse osmosis drinking water kits etc.

The IL inline cartridges are simple to install with optional quick-connect fittings and have the unique advantage of being hygienic in the fact that both the housing and media are incorporated. Installation kits available.

Code	Size inches	Connection	Description	Purchase Qty (ea) as required	Flow lpm	Qty	List (ea) Incl.GST
