

Chilled & Filtered Drinking Water Appliance

Great Tasting Water:

Sparkling clean, filtered, chilled water is nature's most refreshing drink.

The Billi Alpine's dual stage, large capacity water filtration system effectively removes or reduces undesirable sediment, chemicals, heavy metals, chlorine, pesticides, taste and odour.

Micro Filtration:

The Billi Alpine's 1-micron rated water filters are NSF certified to safely remove health threatening giardia and cryptosporidium

Special filter action removes dissolved heavy metals - an unseen potential health hazard
Other cartridges are also available to suit the particular needs of different water supply area

BILLI ALPINE

The Billi Alpine a perennial stream of refreshingly chilled, sparkling, crystal-clear drinking water.

A compact under bench drinking water appliance providing chilled and filtered water at the touch of a lever.

- Compact Design
- Timelessly Styled
- Energy Efficient
- Simple to Install
- 2 Year Warranty

High Energy Efficiency

The unique Billi Alpine chiller system is designed to be extremely energy efficient the Alpine's refrigeration system has a large chilling capacity yet draws only a small electrical current, so running costs are minimal

Whisper Quiet

The innovatively designed Billi Alpine Chiller has no fan and so is whisper quiet, vibration-free and completely unobtrusive in operation.

NORTHERN WATER SOLUTIONS

No Cupboard Venting:

Venting of the cupboard area is not required when installing a Billi Alpine, simplifying installation and space requirements.

Air clearance around the unit is not needed and there are no grilles to keep clean or any noisy energy consuming fans.

Billi Alpine Warranty:

The Billi Alpine refrigeration system is covered by a full 2-year warranty. All other components are covered by a 12-month warranty. Filter cartridges are a consumable and are not covered by warranty, as usage and water conditions vary.

Accessories Supplied:

The Billi Alpine is supplied with all tubing and fittings required for installation including a Watermark approved pressure reducing and backflow prevention valve. Complete installation instructions are supplied with each unit.

Power Requirements:

For installation where the Alpine Filtration system only is installed, there are no power requirements. For installations including the Billi Alpine Chilled Water Module, a standard 10-amp power outlet is required in the cupboard area where the unit is to be installed.

All Alpine models are supplied with a 1 metre flex cord and plug.

Drainage:

The Billi Alpine requires a drainage point such as a dishwasher nipple to be provided.

Variable Temperature:

The Billi Alpine features an easily adjustable control knob to vary the chilled water temperature to suit the user's requirements

Approvals:

Every Billi Drinking water Appliance is manufactured under a certified quality control system.
